English

## AWARDED BY:

Establishing an Enterprise Architecture Practice can be a daunting challenge. In this course, experienced EA practitioners share their knowledge on how to get started with implementation.

## WHO IS THIS COURSE AIMED AT?

- You should take this course if you have knowledge of EA, are TOGAF certified, or are studying for certification
- You are commencing or want to improve your EA Practice You need to 'sell' TOGAF internally within your organization
- You wish clear guidance from senior EA Practitioners on how to get started with implementation
- You want exposure to the key implementation challenges you and your team will face
- You are a newly-appointed EA Manager, a Chief Architect, an experienced EA practitioner, Lead Architect, Project/ Programme Manager
- You want to study in your own time and at your own pace on the device of your choice

## WHAT WILL YOU LEARN?

This course is all about getting started with an Enterprise Architecture practice. In particular, it looks at what should be considered when attempting to establish or improve an existing EA practice.

It provides the background to TOGAF-style architectures, as well as exposure to many subjects that are often glossed over by other enterprise architecture frameworks.

The following modules are included:

- Module 1: An Overview of TOGAF - Linking Business & Architecture
- Module 2: The Enterprise Architecture Practice
- Module 3: EA Practice - Implement Vs Integration Approach
- Module 4: EA Practice - Demand & Supply
- Module 5: EA Practice - Interaction of Strategy, Architecture & Delivery
- Module 6: EA Practice - Operating & Engagement Models
- Module 7: EA Practice - Capability Assessment
- Module 8: Governance - Standards & Principles
- Module 9: Services, Capabilities & Tools
- Module 10: Communications Strategy & Execution
- Module 11: EA Charter

## IS THERE AN EXAM?

No. This is a practically-oriented course, and does not come with any certification. But rather than simple quizzes on content, each module concludes with a written exercise that encourages you to apply what you have learned. An experienced EA Practitioner will review what you have written.
